

# Beam Services

Project Management, Service Engineer Co-ordinators & Equipment Supplier

## **INTRODUCTION**

I would like to take this opportunity to introduce Beam Services to you.

Beam Services has been established for some 15 years undertaking the installation, repair and servicing of various waste disposal, waste recycling, screw technology and other plant equipment supplied by different manufacturer's, we also undertake project management contracts for the installation of new or removal of end of life equipment for many respectable manufactures and companies in the Waste Industry.

As you know when your baler, compactor, waste processor or associated equipment goes down so do most of your production lines due to the waste build up, so this calls for a reliable, quick and competent breakdown service. Our engineer's are multi skilled and fully conversant with most makes of recycling equipment, they carry fast moving spares and tools needed for most breakdowns.

We offer an on call engineer service which is available via our service hotline numbers 24hrs a day 7 days a week for the simple to the serious problems (we would prefer ten minor calls than one serious accident) encountered by your operators, once a call is received the necessary action will be taken to get your equipment up and running with the minimum amount of fuss and down time, this being said Beam Services recommend scheduled servicing to keep your equipment in the safe and reliable condition required for a busy waste handling and recycling department.

Beam Services carry large amounts of spare parts and consumables in our stores and we have access to most fast moving spare parts that we don't hold in our stores which can be supplied immediately by courier delivery or overnight dispatch depending on your company's requirements.

Beam Services can source recycling equipment and undertake project managed installations, servicing and maintenance at a time to suit your operational needs.

Beam Services also undertake advisory training of operators in the safe operation of all recycling equipment as we feel this helps to keep the operator safe and equipment used correctly.

I have included our information flyer with this letter for your perusal and hope that we may be of some assistance to your company. We will be following up this letter in the next week or two with a telephone call to discuss any requirements you may have now or in the future, if you really don't want us to contact you please call or email us and your contact details will be removed from our database all we would ask is that you keep Beam Services on file for future reference.

If you have an immediate enquiry or what to discuss any of the above then please call us on the numbers below or email us at [service@beam-services.co.uk](mailto:service@beam-services.co.uk)

## **A SELECTION OF SERVICES AVAILABLE**

(If your requirements are not detailed below please call to discuss)

### **MACHINERY INSTALLATION**

Removal, Transport (arranged) and Installation of Recycling equipment, Conveyor systems and Machinery. Turn key service available through our own project management division.

### **MACHINERY REPAIRS**

Repairs carried out to all types of recycling machinery i.e. Balers, Shredders, and Waste Compactors etc on site or in our workshop.  
Repair, overhaul and modification of conveyor systems.

### **FULL ON SITE SERVICING**

All machinery and plant serviced on site at a time to suit your production  
i.e. Nights, Weekends and Shutdowns  
Preventative maintenance schedules and Service plans available to suit your requirements

### **REPLACEMENT PARTS AND SUPPLIES**

Spare parts sourced and delivered to suit your requirements  
Most consumables carried in stock or can be sourced quickly and delivered to your site

### **HYD / AIR / ELEC SYSTEM REPAIRS**

Replacement or repair of Hydraulic system components.  
Replacement or repair of Compressed air and Air movement systems.  
Replacement or repair of Machinery Electrical and Management systems.

### **OPERATOR TRAINING**

Extra operator training to supplement manufacturers training available.

### **24 hr ON CALL OPERATOR ASSISTANCE**

24 hr Call out breakdown service available.  
24 hr Phone assistance available.

### **GENERAL FABRICATION**

All types of fabrication or repairs arranged and coordinated from Standard replacement parts to custom bespoke items.

### **FULLY EQUIPPED SERVICE VANS**

Service van equipped with most tools and fast moving spare parts required for breakdowns, onsite repairs and installation.

### **BUILDING REPAIRS AND MODIFICATION ARRANGED**

Repairs to building cladding and modifications.  
Installation of air movement equipment, extraction equipment and machinery access platforms.  
Civil works arranged for complete turn key projects

### **ALL UK/EIRE AREAS COVERED AND EU WORK CONSIDERED**

Brooklyn House, Woodbatch Lane, Bishops Castle, Shropshire. SY9 5JT

Office Tel/fax: +44(0)1588 630430

Mobile: +44(0)7971 480460 or +44(0)7971 097460

## OUR LATEST PRODUCT

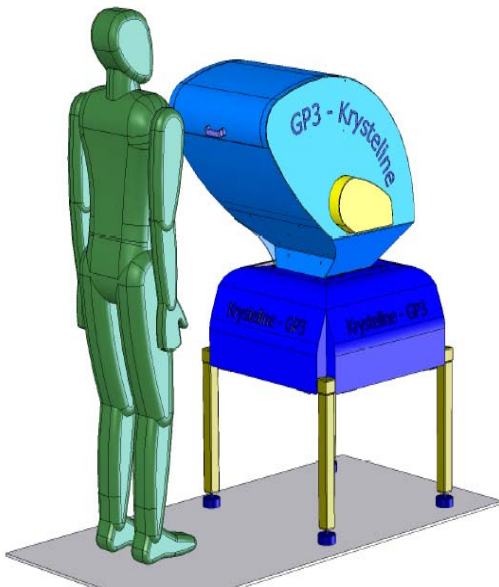

**“Reduce your mass by imploding your glass”**

### The GP3 Glass Processor

The GP3 is a rugged glass processor specifically designed for use in commercial environments where high power processing combined with ease of use and a small footprint is required. It features an automatic hopper feed system contained within a steel housing. The GP3 is designed for low maintenance trouble free operation in the most arduous conditions.

### Benefits

The GP3 transforms waste container glass into safe and sharp free cullet in a single operation. Glass containers are reduced to approximately 5% of their original volume making collection safer and more cost effective. The GP3 hopper is designed for bulk feeding from a 10-litre bucket and fully enclosed automatic processing. Processed cullet is safely stored in a specified receiving container. The recovered cullet lends itself to re-sale (dependant on quantities). Contact Beam Services for further information.

-  Designed for use in commercial environments.
-  Rugged steel construction and replaceable low cost wear plates fitted as standard.
-  Easy to install, plugs into 13 amp socket.
-  Enclosed 80 litre hopper with safety interlocked feed chute.
-  Cost effective, on-site storage of processed glass suitable for safe disposal or even resale.
-  The GP3 is suitable for replacement or will compliment “on-site” bottle banks.
-  The GP3 has 1000kg/Hr processing capacity.
-  Manufactured to BS EN ISO 9002.
-  Dimensions: Height: 1600mm.  
Width: 800mm.  
Depth: 800mm.
-  The GP3 has larger relatives that can handle 1000kg to 30000kg per hr.

**“The glass cullet can be handled safely”**

## SOME OF OUR OTHER RANGE OF PRODUCTS AVAILABLE

### TWIN CHAMBER BALERS

-  Easy to install, plugs into 13 amp socket.
-  Chamber free for loading while other compartment compacts.
-  Bale can be recycled to reduce impact on the environment.
-  Baler will compress cardboard, paper, plastic and textiles.
-  Vertical and free standing so minimum floor space.
-  Features include: Key Stop, Emergency Stop, Ram Guide, Fibre Glass Top, and Directional Indicators.

### UNDER COUNTER BAG COMPACTORS

-  Saving Money / Saving Space / Improved Hygiene.
-  Fewer Storage containers, tidier and cleaner waste storage areas.
-  Hardwearing stainless steel finish means it's easy to clean for Hygiene and looks good.
-  Greater Convenience and easy to use.
-  Dimensions: Height: 840mm.  
Width: 400mm.  
Depth: 600mm.
-  Easy to install, plugs into 13 amp socket.

### STATIC COMPACTORS

-  Standard & Special Manufacture Available.
-  Extensive Range of Compactors available including screw technology for liquid extraction
-  Better Housekeeping & Reduces Labour Costs.
-  Easier compliance with legislation, Secure destruction & Improved Company Image.
-  Second hand & refurbished units available.
-  Hoppers, Binlift systems, Loading decks etc available.

## SOME OF OUR OTHER RANGE OF PRODUCTS AVAILABLE

### MILL SIZE VERTICAL BALERS

-  Large Feed Door.
-  415v 50Hz 5.5 Kw supply.
-  31.5 tonne Platen force.
-  Heavy Duty Construction.
-  Safe & Easy Operation.
-  Front access only wiring versions available.
-  Handles Cardboard, Plastics & Foam.
-  Produces up to 600Kg Bales.
-  Special design versions available including rear loading and conveyor fed.

### LOW HEIGHT VERTICAL BALERS

-  Large Feed Door.
-  415v 50Hz 3 Kw supply.
-  Fast Cycle time of 40 seconds.
-  Heavy Duty Construction.
-  Safe & Easy Operation.
-  Handles Cardboard, Plastics & Foam.
-  Produces 200 to 350Kg Bales.
